EviCore Solution Architect Roles and Responsibilities Analysis

This page was created as a part of ongoing conversations on the roles and responsibilities of the Solution Architecture team. The documentation below does not provide a formal description but instead provides a space of conversations and improvements of our work.

People and Person as	**Description of the nature of the engagement with the individual and or team.**	**How often would you expect to be engaged with the individual and or team?**	**What would be our key goal/s for our interactions and relationship?**	**What would we produce through, during or in support of the relationship and interactions?**	**How would we measure our success or failure?**
Doctors	Sometimes as a stakeholder	Sometimes	A good collaborator	Trust in technology team's ability to support the UM needs	Involvement of SAs
Nurses	Sometimes as a stakeholder	Sometimes	A good collaborator	Trust in technology team's ability to support the UM needs	Involvement of SAs
Call Agents	Sometimes as a stakeholder, Based on Project requirement sometime need to understand call agent flow and challenges	Sometimes, Depends on Project	A good collaborator, To understand the agents flow and sometime bottlenecks they run into while	Trust in technology team's ability to support the UM needs, Product current understanding and challenges	Involvement of SAs

			supporting customers		
Compliance / Auditors	Data Governance Alignment, Requestor To verify the compliance requirement while designing or supporting solution For example: Letter generation	Project KickOff, Sometimes Often for specific requirement in Project until compliance signoff	Interactions to ensure right understanding and direction that may impact systems, technology partner to help remediate the issues To get compliance review the solution and provide signoff	Project specific architecture product, Trust, Solution which is compliant	Architecture rating system, Involvement of the SAs
Sales Team	Client Solutions Alignment Product/Project understanding	presales architecture work, Frequently, Pre-Sales to understand and explain the feasibility of new product and while initial project discussion to understand	Providing Architectural guidance, good collaborator Project understanding and high level design/feasibility accordingly	Sales support architecture artifacts, Trust and deliverables such as RFPs. Also, Support client discussions High level understanding and requirement understanding document	Architecture rating system, Sale achieved,

		the requirement better			
Legal	Understanding Legal complication For example: Legal advice during CCA approval	Rarely, Minimal	Support from a data standpoint Legal guidance and approvals	RCA on CAP Legal approvals	Architecture rating system, deliver the RCAs,
Finance Resources	During solution design impacting finance	Often for specific finance requirement in Project	Understanding and solution financial requirement	Solution artifacts	Architecture rating system.
BPOs	Architecture consideration, Stakeholder During solution design and decomposition	Upfront & throughout at certain junctures, Frequently, Often	Providing Architectural guidance, Requirement Understanding, Supporting PO's for all the product needs end to end	Technical direction / architectural guidance, Discovery documents, Solution design artifacts if required	Architecture rating system, completed discovery documents ,
TPOs	Architecture consideration, Stakeholder During solution design and decomposition	Upfront & throughout at certain junctures, Frequently, Often	Providing Architectural guidance, Requirement understanding , Supporting PO's for all the product	Technical direction / architectural guidance, Discovery documents, Solution design artifacts if required	Architecture rating system, completed discovery documents ,

			needs end to end		
Dev Managers	Architecture Checkpoint, Development support During Discovery, Decomp and Development	strategic points, Sometimes, Often	Providing Architectural Support, Able to influence the need of certain projects, software solutions, and capacity Explaining the requirement, recommending solution and providing support during decomp	Technical direction / architectural guidance, Trust to become good partners Architecture support document if required	Architecture rating system, Trust established,
Scrum Masters	Architecture Checkpoint, Development support After Decomp and before Development	strategic points. Often	Providing Architectural Support. Refinement and clarification	Technical direction / architectural guidance. Updated boards and refined user story	Architecture rating system.
Development Leads	Architecture Checkpoint, Development support During Discovery, Decomp and Development	arch support calls, Sometimes, Often	Providing Architectural Support, Able to influence the need of certain projects, software	Technical direction / architectural guidance, Trust to become good partners Architecture support	Architecture rating system, Trust established,

			solutions, and capacity Explaining the requirement, recommending solution and providing support during decomp	document if required	
Developers	During Discovery, Decomp and Development	Frequently, Often	Guidance Explaining the requirement, recommending solution and providing support during decomp	Trust to become good partners Architecture support document if required	Architecture rating system, Trust established,
App Dev Testers	During testing phase	Frequently, Often	Guidance Understanding and reviewing the test cases and explain the requirement for it if required	Architecture support document if required	Architecture rating system, Trust established,
Technology Security Team	During Discovery and Decomp	Depends on the project	Security understading and impact for the initiative	Discovery detail document	Architecture rating system.

Project Managers	Architecture consideration Project Mgmt. Support From Decomp to end	strategic points. often	Providing Architectural guidance / support. Providing Architectural Support for the Project	Technical direction / architectural guidance. Documents if required.	Architecture rating system.
Project Sponsors	Architecture consideration. After Discovery	strategic points. minimal	Providing Architectural guidance / support. Explaining the discovery details	Technical direction / architectural guidance, help define the goal. Updated Discovery detail document	Architecture rating system.
eviCore Operations	Architecture consideration, Stakeholder, During Decomp	strategic points, Sometimes, Depends on the project	Providing Architectural guidance / support, escalation, Understanding and providing Architecture support to ops team	Technical direction / architectural guidance, escalation forms. Share Architecture diagram if needed	Architecture rating system.
Client Data Ingestion Teams	Architecture consideration, Development support During Discovery, Decomp and Development	strategic points, Frequently, Depends on the project	Providing Architectural guidance / support. Explaining the requirement, recommendin	Technical direction / architectural guidance, Trust to become good partners	Architecture rating system.

			g solution and providing support during decomp	Architcture support document if required	
Client Data Analytic Delivery Teams	Architecture consideration, Development support During Discovery, Decomp and Development	strategic points, Frequently, Depends on the project	Providing Architectural guidance / support. Explaining the requirement, recommending solution and providing support during decomp	Technical direction / architectural guidance, Trust to become good partners Architecture support document if required	Architecture rating system.
Technology Network Team	Development support During Discovery and Decomp	Frequently, Depends on the project	Guidance, Network understanding and impact for the initiative	Trust to become good partners Discovery detail document	Architecture rating system.
Data Management Teams	Architecture consideration, Development support During Discovery, Decomp and Development	strategic points, Frequently, Depends on the project	Providing Architectural guidance / support, Guidance, Explaining the requirement, recommending solution and providing support during decomp	Technical direction / architectural guidance, Trust to become good partners Architecture support document if required	Architecture rating system.

Data Center Resources	Architecture consideration. Not directly, connect through one of the team mentioned separately	strategic points. Depends on the project	Providing Architectural guidance / support.	Technical direction / architectural guidance.	Architecture rating system.
Technology Vendor Representatives	Architecture consideration. During Discovery and Decomp	strategic points. Depends on the project	Providing Architectural guidance / support, Learning, Technology understanding which vendor support and impact for the initiative	Technical direction / architectural guidance. Discovery detail document	Architecture rating system.
Internal "Cigna" Partners	Stakeholder During Discovery, Decomp and Development	Depends on the project	Learning, Explaining the requirement, recommending solution and providing support during decomp	identify the opportunities to learn existing tech stack an business function and it's marketability to eviCore's business Architecture support document if required	Architecture rating system.

Enterprise Architects	Architecture consideration, Mentors During Discovery and Decomp	strategic points, Frequently, Depends on the project	Providing Architectural guidance / support, Collaboration, Creating and supporting Architecture Design for the project	Technical direction / architectural guidance, Solution vetting Solution artifacts	Architecture rating system.
Leadership / Executive Team	Architecture consideration, Stakeholder After Discovery	strategic points. Minimal	Providing Architectural guidance / support, Service reviews and innovation ideas, Explaining the discovery details	Technical direction / architectural guidance, deliver on promise. Updated Discovery detail document	Architecture rating system.
Client Partners	Architecture consideration, Stakeholder During Discovery and Decomp	strategic points. Depends on the project	Providing Architectural guidance / support, collaboration Understanding the requirements, explaining the discovery and solution design	Technical direction / architectural guidance, serve the short term and goals of eviCore by helping serve the needs of the client. This shall result in better client retention and sales opportunities	Architecture rating system.

				Discovery detail document	
SLDC Process	**Description of how we would be engaged in the SLDC " step".**	**What would be our key goal/s for our engagement in the SLDC "step".**	**What would we produce through, during or in support SLDC "step".**	**How would we measure our success or failure?**	
Initiative Identification	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for alignment on other architectural consideration purposes Architecture Impact from understanding the requirement to creating the discovery	Give key architectural inputs. Understanding the initiative	Architectural alignment /system principle validation & assurance. Architecture practice documentation. Creating discovery details	Architecture rating system.	
Initiative Definition	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and	Give key architectural inputs. Understanding the impact and document	Architectural alignment /system principle validation & assurance.	Architecture rating system.	

	system implementations for alignment on other architectural consideration purposes Architecture Impact from understanding the requirement to creating the discovery	details from high level perspective	Architecture practice documentation. Creating discovery details		
Initiative Prioritization	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for alignment on other architectural consideration purposes Architecture Impact from understanding the requirement to creating the discovery	Give key architectural inputs. Explaining the discovery details and get the initiative prioritized	Architectural alignment /system principle validation & assurance. Architecture practice documentation. Updating discovery details if required.	Architecture rating system.	
Roadmap Creation and Management	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for	Give key architectural inputs. Take the initiative to next steps providing	Architectural alignment /system principle validation & assurance. Architecture practice	Architecture rating system.	

	alignment on other architectural consideration purposes Explaining the requirement, recommending solution and providing architecture support	architectural support	documentation. Supporting documents if required		
PI Planning and Work Introduction	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for alignment on other architectural consideration purposes Explaining the requirement, recommending solution and providing architecture support	Give key architectural inputs. Take the initiative to next steps providing architectural support	Architectural alignment /system principle validation & assurance. Architecture practice documentation. Supporting documents if required	Architecture rating system.	
Requirement Definition	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for	Give key architectural inputs. Take the initiative to next steps providing	Architectural alignment /system principle validation & assurance. Architecture practice	Architecture rating system.	

	alignment on other architectural consideration purposes Explaining the requirement, recommending solution and providing architecture support	architectural support	documentation. Supporting documents if required		
High-Level Design	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for alignment on other architectural consideration purposes Explaining the requirement, recommending solution and providing architecture support	Give key architectural inputs. Take the initiative to next steps providing architectural support	Architectural alignment /system principle validation & assurance. Architecture practice documentation. Supporting documents if required	Architecture rating system.	
Technical Design	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for	Give key architectural inputs. Take the initiative to next steps providing	Architectural alignment /system principle validation & assurance. Architecture practice	Architecture rating system.	

	alignment on other architectural consideration purposes Explaining the requirement, recommending solution and providing architecture support	architectural support	documentation. Supporting documents if required		
Build	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for alignment on other architectural consideration purposes Explaining the requirement, recommending solution and providing architecture support	Give key architectural inputs. Take the initiative to next steps providing architectural support	Architectural alignment /system principle validation & assurance. Architecture practice documentation. Supporting documents if required	Architecture rating system.	
Architecture Review	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for	Give key architectural inputs. Take the initiative to next steps providing	Architectural alignment /system principle validation & assurance. Architecture practice	Architecture rating system.	

	alignment on other architectural consideration purposes Explaining the requirement, recommending solution and providing architecture support	architectural support	documentation. Supporting documents if required		
Code Review	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for alignment on other architectural consideration purposes Explaining the requirement, recommending solution and providing architecture support	Give key architectural inputs. Take the initiative to next steps providing architectural support	Architectural alignment /system principle validation & assurance. Architecture practice documentation. Supporting documents if required	Architecture rating system.	
Testing	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for	Give key architectural inputs. Take the initiative to next steps providing	Architectural alignment /system principle validation & assurance. Architecture practice	Architecture rating system.	

	alignment on other architectural consideration purposes Understanding and reviewing the test cases and explain the requirement for it if required	architectural support	documentation. Supporting documents if required		
Deployment	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for alignment on other architectural consideration purposes Providing Architecture Support if required for scheduling, explaining the dependencies etc	Give key architectural inputs. Take the initiative to next steps providing architectural support	Architectural alignment /system principle validation & assurance. Architecture practice documentation. Supporting documents if required	Architecture rating system.	
Health Issue Identification	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for alignment on other	Give key architectural inputs. Understanding the issue	Architectural alignment /system principle validation & assurance. Architecture practice	Architecture rating system.	

	architectural consideration purposes Understanding and reviewing the issue and explain the requirement and design for it if required		documentation. Supporting documents if required		
Health Remediation Planning	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for alignment on other architectural consideration purposes Understanding and reviewing the issue and explain the requirement and design for it if required	Give key architectural inputs. Understanding the issue and creating the high level solution design for remediation	Architectural alignment /system principle validation & assurance. Architecture practice documentation. Supporting documents if required	Architecture rating system.	
Definition of Health and Tech Debt Work	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for alignment on other	Give key architectural inputs. Based on understanding define the tech debt and issue it is	Architectural alignment /system principle validation & assurance. Architecture practice	Architecture rating system.	

	architectural consideration purposes Understanding the existing solution and impact on current workloads	creating to system health and ultimately solution recommendation for it	documentation. Supporting documents if required		
Application Sunset Identification	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for alignment on other architectural consideration purposes Understanding and reviewing the application details from tech stack to support it needs	Give key architectural inputs. Understanding the application	Architectural alignment /system principle validation & assurance. Architecture practice documentation. Supporting documents if required	Architecture rating system.	
Application Sunset Planning	Architectural Oversight. (ear to the ground - correlating enterprise strategics with tactical architecture and system implementations for alignment on other architectural consideration purposes	Give key architectural inputs. Understanding the solution and destination for sunsetting application	Architectural alignment /system principle validation & assurance. Architecture practice documentation.	Architecture rating system.	

	Based on understanding, reviewing the solution design required for sunsetting the application		Supporting documents if required		
Applications, Infrastructure, Technology and Tooling	**Description of the nature of the engagement.**	**How often would you expect to be engaged?**	**What would be our key goal/s for our engagement on the subject / technology?**	**What would we produce through, during or in support of the engagement on the subject / technology?**	**How would we measure our success or failure?**
Legacy Apps	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement for which we are interacting	Supporting documents if required	Architecture rating system.
Greenfield Apps	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement	Supporting documents if required	Architecture rating system.

			for which we are interacting		
Legacy Infrastructure	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement for which we are interacting	Supporting documents if required	Architecture rating system.
Cloud Infrastructure	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement for which we are interacting	Supporting documents if required	Architecture rating system.
Hybrid Infrastructure	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement for which we are interacting	Supporting documents if required	Architecture rating system.
Policy and Procedures	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval.	Supporting documents if required	Architecture rating system.

			Support the requirement for which we are interacting		
Intermodal communications	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement for which we are interacting	Supporting documents if required	Architecture rating system.
Data Acquisition	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement for which we are interacting	Supporting documents if required	Architecture rating system.
Data Delivery	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement for which we are interacting	Supporting documents if required	Architecture rating system.
Resiliency	Architectural Oversight.	end2end - strategic points.	key inputs, opinions & overall	Supporting documents if required	Architecture rating system.

	For Architecture Understanding and inputs	Often	architectural approval. Support the requirement for which we are interacting		
System s Design	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement for which we are interacting	Supporting documents if required	Architectur e rating system.
Solution s Design	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement for which we are interacting	Supporting documents if required	Architectur e rating system.
Team Building	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement for which we are interacting	Supporting documents if required	Architectur e rating system.

Education	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement for which we are interacting	Supporting documents if required	Architecture rating system.
Learning	Architectural Oversight. For Architecture Understanding and inputs	end2end - strategic points. Often	key inputs, opinions & overall architectural approval. Support the requirement for which we are interacting	Supporting documents if required	Architecture rating system.
